Outdoor high-density, future proof Wi-Fi

access point (AP) designed to deliver future-proof

more than tripling the wireless spectrum available.

Software-defined radio provides flexibility

 Manage by cnMaestro, XMS-Cloud, Swift

The XE3-4TN is an outdoor rated tri-radio Wi-Fi 6/6E 4x4/2x2

performance and value for building next generation networks. Wi-Fi 6 delivers faster and more efficient wireless network

connections than previous generation Wi-Fi technologies. Wi-Fi 6E extends the capacity of Wi-Fi into the 6 GHz band,

The software-defined radio (SDR) provides flexibility to match

the capability of the connected clients and to match the regulatory limits in the 6 GHz band. Where 6 GHz outdoor is not allowed, operate the XE3-4TN in dual 5 GHz mode to expand capacity in the allowed 5 GHz channels. Where 6 GHz outdoor is allowed, and Wi-Fi clients support it, use tri-radio mode to dramatically increase density in a reduced

The XE3-4TN comes with industry leading three-year hardware warranty providing return and repair service on the access point and multiple tiers of customer support from the business day to extended hours and advanced replacement.

RF interference environment.

<sup>\*</sup> Automatic frequency coordination (AFC) is under development and will be a cloud service that will assign operating channel and power. AFC is required for 6 GHz operation outdoors.
