WI-FI 6 DESIGNED FOR MOBILE DEVICES AND IoT

The XV2-2X is a dual-radio Wi-Fi 6 access point (AP) designed to deliver next generation networks with edge services at a value-based price. Wi-Fi 6 technology delivers higher network speeds and enables more connected devices at higher packet quality. Wi-Fi 6 brings a deterministic model to the radio frequency (RF) layer where the AP controls the client connections, including when to sleep, when to wake and how to transmit and receive packets. The XV2-2X is fully backward compatible with existing Wi-Fi technology and enables a massive growth of low power, low-bitrate IoT devices to add infrastructure intelligence into any market.

XV2-2X comes with Limited Lifetime Warranty providing return and repair service on the access point from date of purchase until end of life of the product.

CLOUD AND ON-PREMISES MANAGEMENT

XV2-2X is advancing enterprise network convergence by integrating edge-intelligent access points, all managed seamlessly through their versatile cnMaestro™ management system, which is accessible both through cloud-based and on-premises solutions. To cater to the increasing need for advanced management and service capabilities, cambium provides two distinct tiers of cnMaestro™:
