Interoperable for voice and T.38 fax with leading SIP service providers, softswitch vendors, and major IP PBX manufacturers.

Why SmartNode?

- Patton Quality
- Swiss Engineered—Made in the USA
- Unrivaled Customer Support
- FREE Software Upgrades

The SmartNode 4141 Series of VoIP Media Gateways support up to eight phone or fax calls. The SN4141 is the perfect choice for All-IP applications where either old, non-replaceable telephones have to be integrated into a UCC environment, or for good old fax devices to be

migrated to the next-generation network infrastructure.

Patton's SmartNode 4141 Series delivers the legacy phone interfaces, service transparency, and flexible integration required for All-IP networks.

Typical Application

In All-IP networks as well as during the migration to the next generation communication network, legacy Telephone equipment will remain for quite some years. The SmartNode 4141 Series will be responsible integrating this equipment at a very low cost for the enterprise. With its modem and fax signal to VoIP conversion capabilities it also helps to solve problems integrating PoS, metering systems, elevator phones, etc., into an All-IP environment.
