

NWA50BE PRO

BE6500 4-Stream WiFi 7 Dual-Radio NebulaFlex Access Point

Zyxel's NWA50BE PRO is a WiFi 7 access point designed for small businesses and SoHo users seeking a cost-effective yet high-performance upgrade. Ideal for home offices, compact workspaces, and residential use, it delivers a seamless transition to WiFi 7 with faster speeds and dependable, wide-reaching coverage.

Powered by a Qualcomm quad-core CPU, the BE6500 (2.4GHz: 2x2:2, 5/6GHz: 2x2:2) dual-radio access point delivers blazing-fast WiFi 7 speeds of up to 6.5 Gbps, ensuring enterprise-grade performance in a compact design. Its innovative BandFlex radio lets you choose between 5GHz and 6GHz, providing a budget-friendly solution that fits seamlessly into your existing 5GHz coverage while being ready for future 6GHz deployment.

Equipped with a 2.5GbE port, the NWA50BE PRO offers a cost-effective way to experience WiFi 7's full potential, delivering multi-gigabit speeds without disrupting your current network setup.

Smart Mesh MLO (Multiple Link Operation) technology automatically establishes dynamic wireless links, eliminating the need for complex, inconvenient cabling in WiFi deployments. Unlike traditional mesh networks that rely on a single radio for data transmission, the NWA50BE PRO utilizes dual-radio backhaul, delivering superior bandwidth, enhanced interference resistance, and ultra-low latency for seamless, high-performance connectivity.

Thanks to NebulaFlex, the NWA50BE PRO provides flexible management options—choose between standalone local GUI management or the intuitive Nebula Cloud management interface. With Nebula, users can enjoy seamless cloud networking without the hassle of remembering IP addresses or passwords.

BE6500 (2.4GHz: 2x2:2, 5/6GHz: 2x2:2) dual-radio access point offers blazingly fast WiFi 7 speeds of up to 6.5Gbps

Smart Mesh MLO with dual-radio backhaul enables dynamic, cable-free deployment while delivering higher performance

BandFlex design supports either 5GHz or 6GHz by configuration, fitting seamlessly into existing 5GHz coverage while futureproofing for 6GHz

The 2.5GbE port boosts speed beyond gigabit for a cost-effective, WiFi 7-ready upgrade

NebulaFlex allows users to switch between standalone or intuitive Nebula cloud managed modes as needed

Benefits

Bringing next generation WiFi within reach

WiFi 7, also known as IEEE 802.11be, represents the next evolution in WiFi standards, supporting all three frequency bands – 2.4GHz, 5GHz, and 6GHz. With its revolutionary technological advancements, it promises to redefine the concept of speed, delivering unprecedented rates to elevate online experiences in the digital realm.

Powered by a Qualcomm quad-core CPU, the NWA50BE PRO access point provides ultra-fast WiFi 7 speeds, ensuring enterprise-grade performance in a compact, small business AP.

MLO: Transforming WiFi 7 for Unprecedented Connectivity

Fundamentally, one of the most pioneering advancements of WiFi 7 is the introduction of MLO (Multiple Link Operation). MLO represents a WiFi technology that empowers devices linked to a WiFi access point (AP) to concurrently transmit and/or receive data through various frequency bands and channels. This entails simultaneous connections across the 2.4GHz, 5GHz, and 6GHz bands, a capability absent in earlier WiFi generations where devices were restricted to a solitary WiFi band connection.

The result is a significant amplification in data throughput, a reduction in latency, and an enhancement in reliability. These outcomes undeniably enhance the user experience and unveil novel opportunities for emerging applications such as VR/AR, online gaming, remote office setups, and cloud computing.

RF First by Design

The advanced RF filter design eliminates interference between the 5GHz and 6GHz bands, while the built-in 4G/5G interference filter allows seamless coexistence with 4G/5G cellular networks and minimizes interference, all of which guarantees a seamless WiFi experience without interruptions.

NebulaFlex – simply manage it your way!

NebulaFlex offers extended flexibility, enabling users to effortlessly switch between standalone mode and our intuitive cloud-managed NCC (Nebula Control Center) modes at any time, without incurring additional costs. This ensures adaptability to changing needs while safeguarding investments in wireless technology.
