

The Yealink UVC20 is a full HD webcam for a brilliant personal desktop video experience, which can be applied to remote working, open meeting scenarios, distance education, training, live streaming, and telemedicine. It will work even better with Yealink headsets!

4 Key Features of UVC20

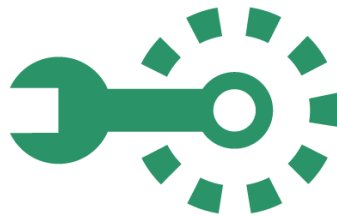

Smooth Video, Premium Experience

5 Mega-pixel full HD glass lens delivers 1080P HD video and true-to-life clarity. The built-in omni-direction mic supports for accurate voice pick up ranging up to 180°/4.9 feet, bringing crystal-clear communication.

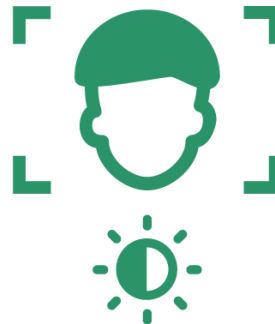

Easy Using, Quick Start-up

As an USB camera, UVC20 is plug-and-play and right for various video conferencing platforms or applications with a convenient BYOD experience.

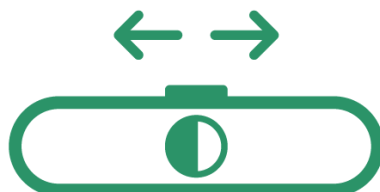

Automatic Exposure, Intelligent Adjustment

Smart Light* optimizes the image for the best even in the lowlight or backlit . Through ePTZ control, auto focus, and rotatable lens, the UVC20 enables to perfectly catch every spotlight without manual adjustment

Lens Cap, Privacy Secure

The built-in lens cap is anti-lost and well protects the camera lens, conference security, and personal privacy, which is reliable and safe for personal desktop use.
